

# AlienVault

Unified Security for Threat Detection and Response

# About AlienVault

- Founded in 2007 and headquartered in San Mateo, CA
- Over 5,000 commercial customers
- Only company to be named “Visionary” in the Gartner SIEM Magic Quadrant in 2013, 2014, 2015 and 2016
- Backed by premier investors

Dell for Entrepreneurs  
Founders 500

# AlienVault Mission

- Simplify how organizations detect and mitigate threats
- Enable organizations to benefit from the power of actionable threat intelligence & unified security
- Provide the perfect, affordable fit for organizations with limited budgets and few in-house resources

# With AlienVault You Can:

- Detect the latest threats without having to buy, deploy and manage multiple products and recruit, hire and retain a staff of security analysts.
- Prioritize the threats that put your business at risk by unifying security technologies and the latest threat intelligence.

# An All-in-One Approach to Threat Detection

## Unified Security Management (USM) Platform

- A single platform for simplified, accelerated threat detection, incident response & policy compliance

## AlienVault Labs Threat Intelligence

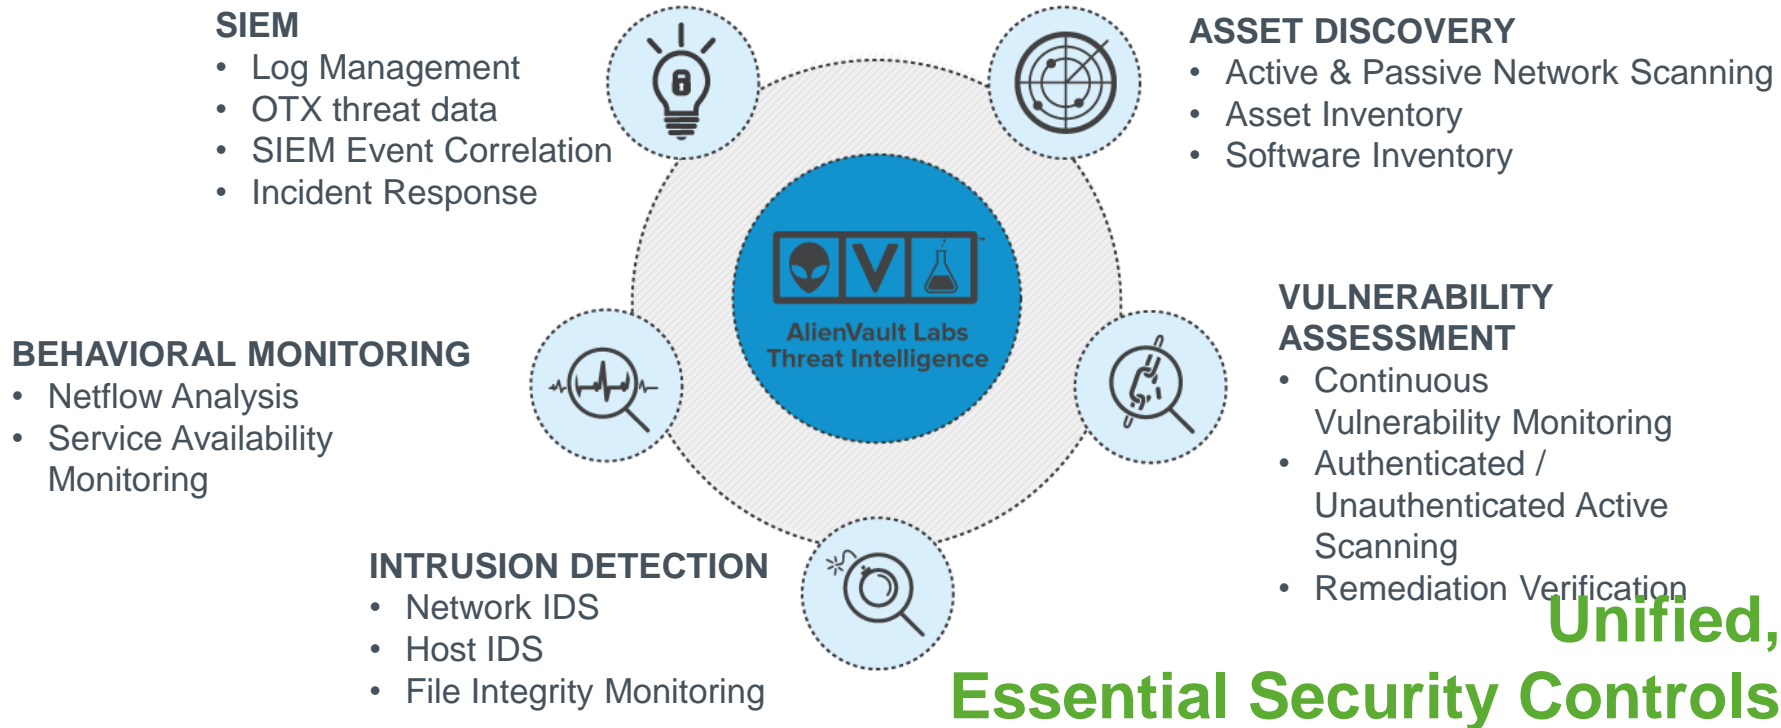

- Actionable information about malicious actors, their tools, infrastructure and methods, automatically updated into the USM platform

## Open Threat Exchange

- The world's largest repository of threat data provides a continuous view of real time malicious activity

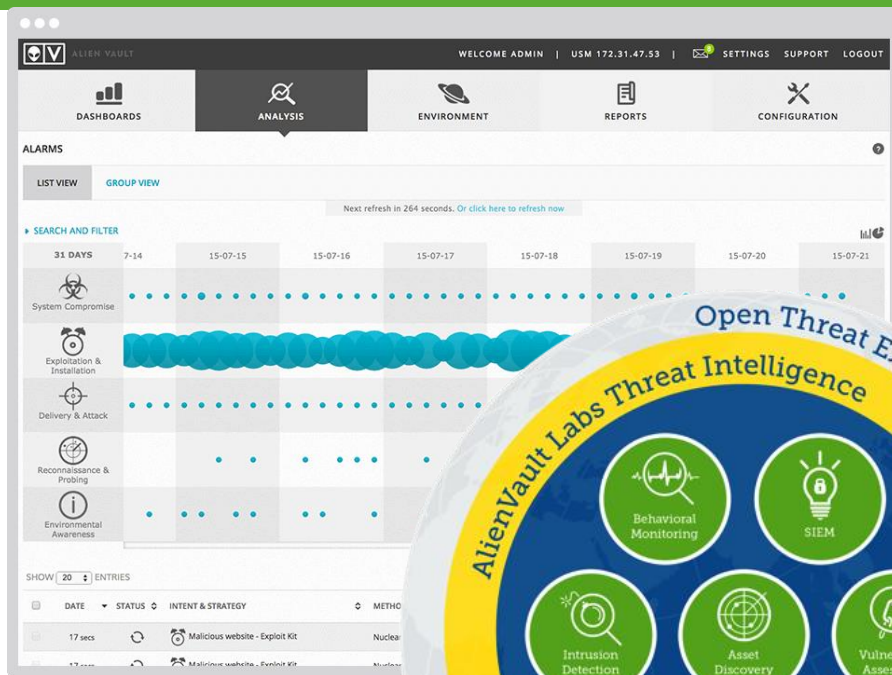

# The USM Platform

# Actionable Threat Intelligence: Let us do the Work!

- Automatically detect and prioritize threats through:
  - ✓ Correlation Directives
  - ✓ Network IDS Signatures
  - ✓ Host IDS Signatures
  - ✓ Asset Discovery Signatures
  - ✓ Vulnerability Assessment Signatures
  - ✓ Reporting Modules
  - ✓ Incident Response Templates
  - ✓ Data Source Plug-Ins
- Spend your time responding to threats, not researching them.

# Open Threat Exchange (OTX)

- The world's first truly open threat intelligence community that enables collaborative defense with actionable, community-powered threat data
- With more than 37,000 participants in 140+ countries
- And more than 3 million threat indicators contributed daily
- Enables security professionals to share threat data and benefit from data shared by others
- Integrated with the USM platform to alert you when known bad actors are communicating with your systems

# Deployment Options to Fit Your Needs

- 👁️ On-premise, in the cloud, or with an Managed Security Service Provider
- 👁️ Physical or virtual appliances for on-premise
- 👁️ Choose All-in-One or separate components

All-in-One  
Appliance

Separate Sensor,  
Server, and Logger  
components

On-Premise

Through an  
MSSP

# What Our Customers Are Saying

“AlienVault USM is a product that I truly believe needs to be in every office and every business. If I could afford it in my home I would have it in a second. I would put one at all my families’ homes. They are only 1 bad email click away from a really bad month or LIFE. Products like this can stop the bad before it becomes bad.”

**Danny Santiago**

Systems  
Administrator

“Suddenly, I’m the go-to guy for security. With so many products/services out there, it’s hard for people to know where to start and where they can get the most bang for their buck. OSSIM was a great starting point for me, and migrating to USM has brought even more value.”

**Matthew J. Frederickson**  
Security Officer

“We did a full competitive comparison of log management tools. We reviewed AlienVault, LogRhythm, Splunk, HP ArcSight and Solarwinds Log and Event Manager. We chose AlienVault Unified Security Management (USM) because it offered more than the other products, at a similar (or better) price.”

**Kevin Geil**  
Security Officer

“At Save Mart, we use the AlienVault Unified Security Management (USM) platform, which is an easy-to-use, affordable solution that enables us to effectively defend against today’s evolving threat landscape.”

**Stephen Molina**
